Market Asking Rent Growth

-1.9%

Retail demand in Hollywood is fueled primarily by tourism, the entertainment industry, and a dense renter population, with strong foot traffic concentrated around landmarks, hotels, and Metro stations. Major employers such as Netflix, Paramount, Viacom, Capitol Records, the Academy of Motion Picture Arts and Sciences, and Technicolor maintain significant presences in the submarket. Demand is particularly strong along Hollywood Boulevard, Sunset Boulevard, and near transit hubs.

The 475,000-SF Ovation Hollywood serves as the submarket's anchor, accounting for roughly 10% of the total 4.8 million SF inventory. Its strong signage, visibility, heavy tourist activity, and enhanced security measures have kept the mall performing exceptionally well. The Ovation includes famous landmarks like Grauman's Chinese Theatre, Hollywood Walk of Fame, and Madame Tussauds Hollywood.

Despite these strengths, the vacancy rate has climbed sharply over the past five years, nearly tripling from a low of 2.6% at the end of 2019 to 8.0% today. Similar to national trends, many local retailers have faced mounting cost pressures—including rising rents, wages, insurance, and goods—which have led some to forgo lease renewals. International tourism is still below pre-

pandemic levels, resulting in reduced foot traffic. Additionally, ongoing challenges related to homelessness, street cleanliness, and safety perceptions continue to weigh on performance.

A lack of new supply provides a significant tailwind for the outlook, limiting downside risk even as near-term leasing conditions soften. Over the past decade, the submarket's retail footprint has contracted by -210,000 SF as demolitions have outpaced new development. This trend is unlikely to reverse soon, given the limited available land and Hollywood's stringent zoning and entitlement requirements. Currently, there is 0 SF of new development in the pipeline.

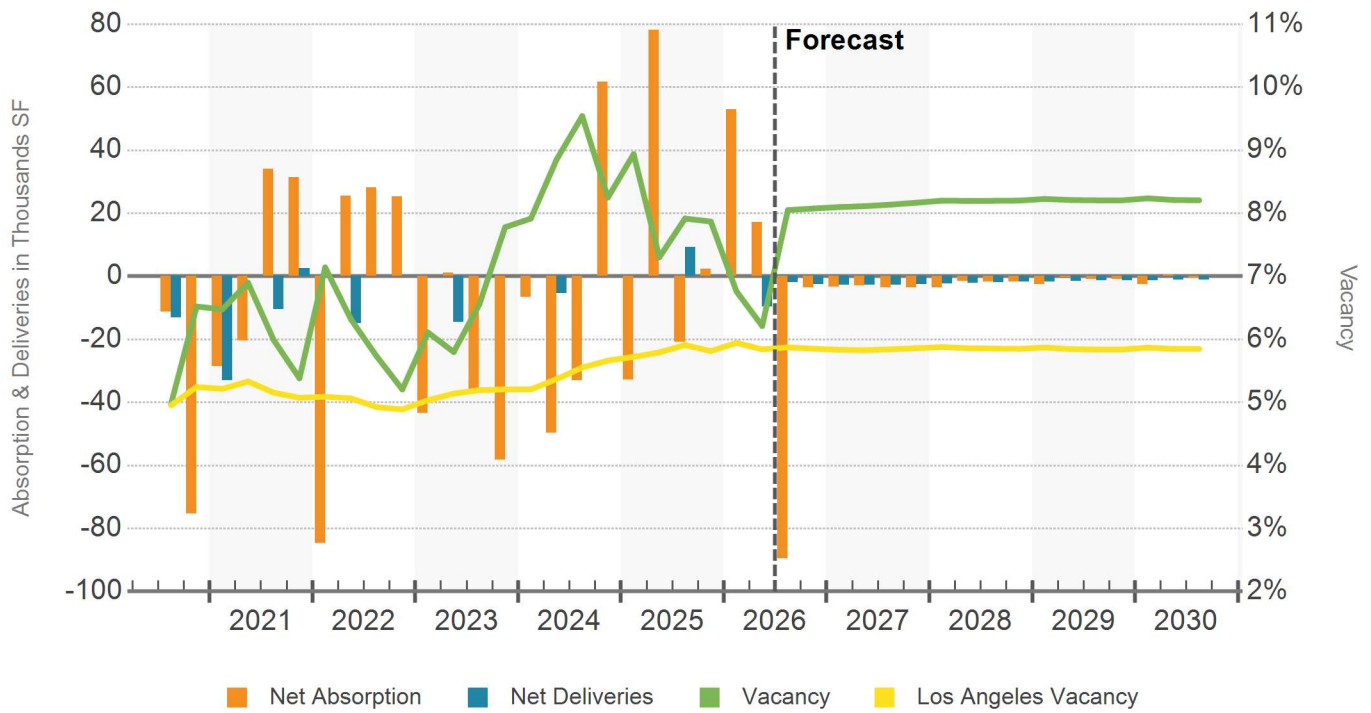

Average retail rents remain among the highest in the market at \$56/SF NNN, roughly \$20/SF above the metro average of \$37.00/SF. Annual rent growth currently stands at -1.9%, the weakest performance since 2011 and underperforms the metro-wide average of -1.1%. Inflation and rising rents have squeezed profitability for local restaurants and mom-and-pop retailers, which typically operate on thin margins, limiting their ability to absorb further increases. Over the past decade, rents have adjusted by 15.5% compared to the market average of 22.0%, and growth is not expected to return to the long-term benchmark of 1.5% until 2029.

1	Tesla Diner 7001 Santa Monica Blvd	★★★★★	9,300	1	Jan 2024	Jul 2025	- Tesla, Inc.

Investment activity in Hollywood's retail market remains limited, with transaction volume consistently trailing the Los Angeles metro average. Property values in the submarket rank among the highest in the region, supported by its central location, dense population, and strong tourism orientation.

Ownership is dominated by private investors, who control roughly two-thirds of the market. Institutional and REIT capital sources account for about 8% of inventory, while fund-level equity represents nearly 15%.

Investors are often drawn to Hollywood for value-add opportunities, given the prevalence of older properties and the potential to achieve higher rents through renovations. Sites with redevelopment potential have also attracted significant interest in recent years.

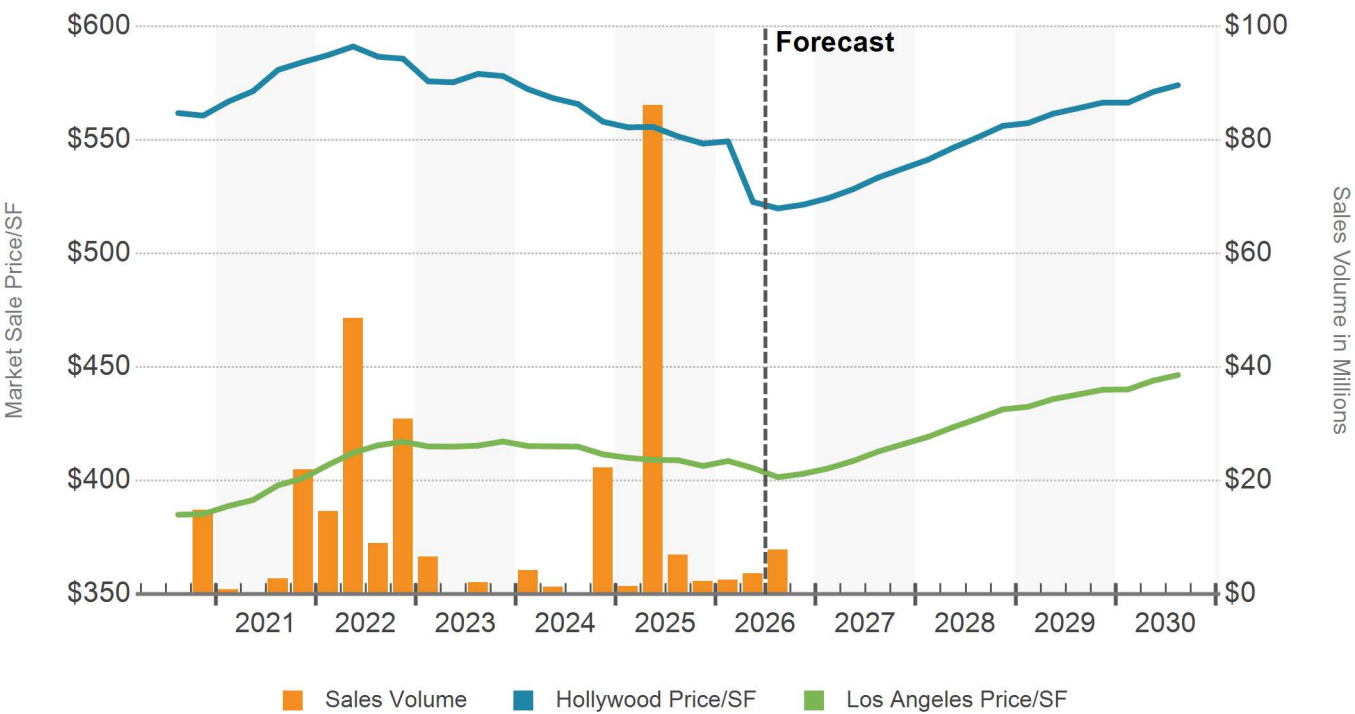

Over the past five years, the submarket has averaged just 9 trades annually, including 10 in the past 12

months. Transaction activity over the past twelve months totaled \$18.8 million, compared to the prior twelve's \$114 million.

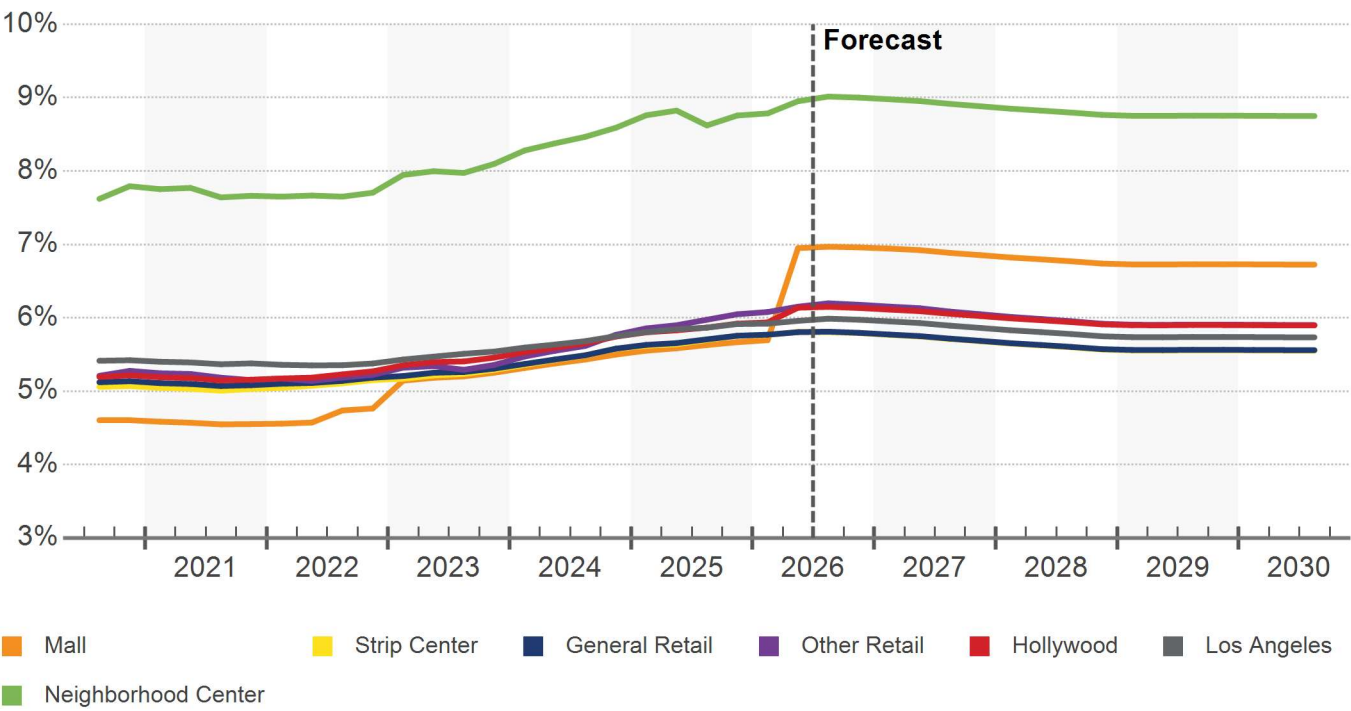

6750 W. Sunset Blvd. sold in July for \$6.3 million or roughly \$2,867/SF. The 2,180 SF fast-food restaurant was traded between two private individuals. The building is fully leased to Chick-Fil-A. This is the largest transaction to occur over the past 12 months.

A notable sale occurred last June 2025, when Federal Realty Investment Trust sold the two-building shopping center, The Hollywood Collection, to UNIMAT Commercial for \$69 million, or about \$382/SF, at a 7.1% cap rate. Tenants at the center included Target, CVS, and LA Fitness. The buyers acquired \$49.7 million in debt to finance the purchase. The larger of the two buildings was 79% occupied, and the property was acquired for its value-add potential.

(1) Completed transaction data is based on actual arms-length sales transactions and levels are dependent on the mix of what happened to sell in the period.

(2) Market price trends data is based on the estimated price movement of all properties in the market, informed by actual transactions that have occurred. The price index is not smoothed.
